

Please amend the claims as follows:

Cancel claims 1-17. Amend claims 18-20 as shown below, and add new claims 21-22.

1-17 (Cancelled)

18. (Presently Amended) A container opener for opening a plurality of different containers, the container opener comprising:

a body;

two or more pockets formed on the body ~~a template defined by the body~~, wherein the ~~template~~ two or more pockets are of different sizes ~~defines one or more pockets~~; and

a ~~first~~ piercing tool supported by the body, wherein the ~~first~~ piercing tool is adapted for piercing and cutting.

19. (Presently Amended) The container opener defined in claim 18, wherein the ~~template~~ body defines ~~further includes~~ a pill splitter for splitting pills or tablets into two or more parts.

20. (Presently Amended) A container opener for opening a plurality of different containers, the container opener comprising:

a body;

two or more pockets defined by the body for receiving objects, wherein the two or more pockets are of different sizes;

a pill splitter defined by the body for splitting pills or tablets into two or more parts;

~~a template defined by the body, wherein the template defines one or more pockets, the template further includes a pill splitting tool, wherein the pill splitting tool includes an upwardly extending wall having a pointed edge and one or more pockets;~~

a first piercing tool supported by the body, wherein the first piercing tool is adapted for piercing and cutting; and

an elastomeric pad supported by the body for frictionally engaging a cap of a container, wherein the elastomeric pad remains substantially flat when engaging the cap.

21. (New) The container opener defined in claim 19, wherein the body supports one or more prying tools.

22. (New) The container opener defined in claim 19, wherein the body supports an elastomeric pad supported for frictionally engaging a cap of a container, wherein the elastomeric pad remains substantially flat when engaging the cap.
